Upholstery Check-In

Scan **every time** upholstery changes hands.

1
Point your phone camera at the code

2
Pick what you're doing & the client

3
List each piece, submit

Back from Tucson? Log it right away: "Ready for reinstallation."

https://acefitnessequipment.github.io/ace-upholstery/

No login needed · one submission per client

ACE FITNESS FOR TECHNICIANS

Logging upholstery

You log upholstery at two moments: when you bring it back from a client, and when you bring it back from Tucson. Scan the QR code by the upholstery area. No login needed.

1 You bring upholstery back from a client

The tech who removed it does this.

1. Scan the QR code.
2. Tap **Checked in at shop**
3. Type the client's name **exactly as it is on the orange tape**.
4. Add each piece on its own line, for example Head pad, then Back pad.
5. Pick your name and tap **Submit**.

2 You bring upholstery back from Tucson

The tech who picked it up does this, as soon as it's unloaded.

1. Scan the QR code.
2. Tap **Ready for reinstallation**
3. Pick the client from the list.
4. Uncheck any piece that didn't come back.
5. Pick your name and tap **Submit**.

That's it. Each submission emails the Director, who schedules the reinstall.

Don't skip step 2. If it isn't logged, the Director won't know the upholstery is back, and the reinstall won't get scheduled.

Good to know

- Keep the orange tape with the client's name on every piece.
- Log one client at a time. Three clients means three quick submissions.
- Client not in the list? Pick **Not in list** and type the name from the tape.
- Damage, wrong color or a missing piece? Write it in **Notes**.
